

Safety-Feed

Full length pickup tube is connected to the Safety Feed™ bung and pre-installed for the end user, virtually eliminating the risk of worker chemical contact and ensuring that all product can be withdrawn from the container

- 
- KleenConnect™ Safety-Feed™ connects a drum or IBC of chemicals to your feed system without ever removing the Safety-Feed bung or handling the pickup tube
 - Patented check valve prevents liquid from flowing back through the special KleenConnect™ adapter while unique venting membrane allows product to vent without leakage
 - EPDM/PVDF construction ensures a wide range of chemical compatibility
 - Use with any 3/8" NPT fitting
 - Fits standard and Butress openings

Ask your supplier to install KleenConnect Safety Feed™ on all your chemical containers

Hand operated dosing pumps attach directly to the KleenConnect Safety-Feed™ bung and fill small containers from the drum. Pump doses 100 ml with each stroke
